BRIDGE BEAM PLACEMENT IN SWANZEY WILL REQUIRE TRAFFIC DELAYS
NH ROUTE 32 BRIDGE OVER THE ASHUELOT RIVER

The New Hampshire Department of Transportation announces the planned setting of steel bridge beams on the new NH Route 32 Bridge over the Ashuelot River in Swanzeay will require periodic traffic delays on Wednesday, August 7 and Thursday, August 8.

Due to weight restrictions on the temporary bridge, no traffic will be allowed on the temporary bridge when the trucks carrying each beam are positioned on the bridge to lift each beam into place on the new bridge.

A total of five beams will be set in place and each traffic stoppage is expected to last no more than ten minutes.

Uniformed officers will maintain alternating one-way traffic at all other times.
